

## WAREHOUSE RACKING INSPECTIONS

If you have pallet racking or shelving in your warehouse, you will already be aware that there is a requirement for it to be inspected regularly and a record kept of the inspection.

Racking Protection and Management can provide the racking inspection which is carried out according to SEMA (Storage Equipment Manufacturer's Association) guidelines and in full compliance with HSG76 issued by the Health and Safety Executive.

Our inspection will provide you with the detailed information to make your site safe and will ensure your compliance with current legislation. It will also provide commentary and recommendations for improving your operation and it will highlight any racking safety issues seen on site.

## RACKING INSPECTION TRAINING

This is aimed at those businesses who wish to carry out their own racking inspections. The half day course, which covers up to 6 participants, is both classroom and warehouse based and will then enable you to carry out inspections on your own racking.

The course provides a copy of HSG76, all course materials and all the documentation that you need for your future in-house inspections. This course is currently available at a cost of £585.00 plus VAT.

## RACKING COLUMN GUARDS

Through our extensive involvement in racking protection we have developed a comprehensive range of racking upright products to protect your racking against impact from fork lift trucks.

Our newest product is the CombiGuard.

The Combiguard comprises the innovative energy absorbing RackDefender insert surrounded by a floor fixed steel guard.

The steel and RackDefender combination provide the ultimate low cost protection to your pallet racking at around **£33.00 per upright** (standard sized upright) plus installation.

## RACKING BARRIERS

We design and manufacture a range of barriers to suit every protection application whether racking, building or simply ARMCO barriers. Our engineers can assess the best barrier for your particular site requirement.

## RACKING REPAIRS

We provide racking repair services which complies with the current SEMA (Storage Equipment Manufacturer's Association) Guidelines.

## INSTALLATION SERVICES

We are able to provide installation services for barriers and racking, installation or relocation.
